Setting up Google Scholar Library Links

There are a few different ways to get links to Resnick Library’s full-text articles for your Google Scholar search results. If you are on campus, Google Scholar should automatically recognize that you are searching from SUNY Delhi and display the full-text links. If you are off-campus, try one of these options.

**Option 1:** Access Google Scholar from this link:

You will be prompted to log in as you normally do to access the databases from off-campus. Use the same username and password you use to log in to Vancko Hall. This link is also available from the library’s list of Databases A-Z and Databases by Subject.

**Option 2:** Set up “Library Links” in your Google account.

If you have a Google account (used for Gmail, Google Drive, YouTube, etc.), you can use this option. Go to [http://scholar.google.com/](http://scholar.google.com/) and click “Sign in” in the top right corner.

Once signed in, click on “Settings” above the search box:
Click on “Library Links” in the menu on the left.

That brings up a search box to “Show library access links for.” Enter in the search box: SUNY Delhi. You may get several options as shown below. Check the box next to “SUNY Delhi- Find Full Text at Delhi” and click the “save” button.

(Continue to next page)
When you return to your search you should see “Find Full Text at Delhi” links wherever the full text content is available for an article. Simply click on the link to access the full text. This will be saved in your settings so that you will see these Delhi links whenever you are signed in to your Google account.
